A NOTE TO OUR RDC RESEARCHERS

Hello, researchers! While the RDC was closed briefly in 2020 due to the COVID-19 pandemic, we are back and running. For the time being, we ask that all researchers using the RDC wear a mask when entering and exiting the room, as well as when meeting with analysts and other researchers. Masks are not mandatory at workstations, however, so feel free to remove them while you work. We also continue to ask that researchers please book their appointment in advance using our Picktime site. Thank you!
RESEARCHER ROLE CALL

Researchers! We are looking for publications and upcoming research to include in our newsletters. If you have any of the following, please send us an email at rdc@uwo.ca to be included in an upcoming newsletter:

- Manuscripts in progress or published using StatCan data this year
- Upcoming events featuring StatCan data, or research using StatCan data

BOOKING PROCEDURES

Since the beginning of the pandemic, we have adopted a booking system for workstations in the RDC. Here are some important tips:

- Researchers are able to book a number of workstations all day. This can be done through the booking site, or you can email the Analysts at rdc@uwo.ca to inquire about having one of us book this for you.
- Researchers should always aim to arrive to their booking within 20 minutes of it beginning. Please let us know if you are running behind, and if you are finishing early. Additionally, please let us know if you need to cancel an appointment.
- Bookings for the following week appear exactly 1 week prior.
DATA ADDITIONS

THIS MONTH

- IMDB 2021
- CNICS_PW_2021
- LFS Monthly Release: Nov 2022 files

UPCOMING

- EICS_2021
- ELMLP: PSIS 2020
- NHS_CEN_CHS_TIFF_T4

RECENT PUBLICATIONS

TIP OF THE MONTH

Remote Meetings in the RDC

Is one of the researchers on your project from out of town/unable to come in and look over your results before submitting? No problem.

Ask one of the analysts if you can set up a phone meeting with other members of your team to virtually go over your findings together and skip additional output requests by signing an attestation.

See analysts for details.
